2026 CATALOG

"ANYTHING THAT MAKES A HOLE"®

CONSTRUCTION DRILLING AND CUTTING SOLUTIONS

WWW.ITMTOOLS.COM | (800) 247-5696 | SALES@ITMTOOLS.COM

100% LAB TESTED

FAST DELIVERY

4000 items. Orders are shipped the same day if received before 3 P.M. Eastern Time.

EASY ORDERING

Order toll free, by fax, or email, either by part number or description. Our staff will quickly help you decide which product best fits your application. Order what you need, there is never a minimum order.

COMPLETE SATISFACTION

Simple: all of your purchases must satisfy you completely, or we will issue you a refund, exchange, or credit.

ITM catalogs are always made with YOU in mind! You will find our catalog easy to use and our staff a valuable resource for your business.

Thank you for your business and patronage.

Call us. We will make your job a little bit easier.

Sincerely yours,

Berardo Paradiso
President - ITM Corp.

Terms Of Sale

- Terms:** 2% 10 Days, Net 30 Days. All credit cards welcome.
- Credit:** Open account privileges are extended to any firm that is satisfactorily rated. New accounts should submit at least 3 commercial references including all contact information and their tax resale number.
- Quantities:** Although there is no minimum purchase order, we reserve the right to adjust any order to the minimum packaged quantities indicated in catalog.
- Claims:** Should be made within 15 days of receipts.
- Freight:** Prepaid for NET invoices equaling \$600 or more.

EFFECTIVE JANUARY 2026.

HSS TOOL DATA

Suggested Drill Bits To Be Used For Various Types Of Materials:

MATERIAL	DRILL STYLE	ANGLE POINT	PRESSURE TO APPLY	COOLANT OR LUBRICANT
CARBON STEEL DUCTILE STEEL BRASS BRONZE	GENERAL PURPOSE DRILLS	118° POINT	MEDIUM TO HEAVY	OIL or WATER SOLUTION
CARBON STEEL ALUMINUM AUSTENITIC STAINLESS STEEL	HEAVY DUTY AND TITANIUM	135° SPLIT POINT	MEDIUM TO HEAVY	OIL or ACTIVATED SOLUTION
STAINLESS STEEL SERIES C CAST IRON	COBALT DRILLS	135° SPLIT POINT	MEDIUM TO HEAVY	OIL or ACTIVATED SOLUTION
HARD STEEL HEAT TREATED ALLOYS	HARD BODY CARBIDE TIPPED AND COBALT	130° & 135° SPLIT POINT	HEAVY	OIL or ACTIVATED SOLUTION

Chemical Analysis Of The Three Primary High Speed Steels Used To Manufacture HSS Drill Bits:

TYPE	CHEMICAL COMPOSITION						ROCKWELL C HARDNESS	TERM
	CARBON	TUNGSTEN	MOLYBDENUM	CHROMIUM	VANADIUM	COBALT		
M2	0.85	6.00	5.00	4.00	1.90	-	63-65	HSS
M35	1.10	1.50	9.50	1.15	1.15	5.00	65-67	COBALT
M42	1.10	1.50	9.50	1.15	1.15	8.00	65-67	SUPER COBALT

M2 "HSS" is the standard material used for all **ITM** drill bits. M2 has good red-hardness and retains its cutting edge longer than other general purpose high speed steels because of its increased quantity of tungsten (dull red heat up to 1000° F without loss of hardness or rapid dulling of cutting edge). M2 is generally favored for high production machine work.

M35 M35 is the standard cobalt material used for most **ITM** cobalt drill bits. M35 has excellent resistance to abrasion and very good red-hardness for working difficult materials.

M42 M42 "Super Cobalt" is American made premium cobalt material used for higher performance **ITM** cobalt drill bits. M42 has the best resistance to abrasion and red-hardness.

COBALT DRILLS

Made of the finest Cobalt steel obtainable and furnished with a 135° split point, these drills are designed for use in machining hard, tough materials beyond the normal cutting capabilities of regular high speed steel tools. These include work-hardening grades of stainless steels, titanium, high temperature alloys, and many other heat treated materials. In addition, due to their resistant properties, they can also be used at higher speeds to drill abrasive plastics, cast iron, and other types of difficult to machine work materials.

Always Use Protection When Drilling.

Always Use High RPM For Smaller Diameters and Lower RPM For Larger Diameters.

HSS TOOL DATA

Understanding High Speed Steel Drill Bits:

118° drill bits have a sharp point and are common on standard / general purpose drill bits where light duty work is needed. Because of this sharp point, 118° drill bits will tend to “walk” or spin like a top on flat surfaces. This is why a centering drill or center punch is normally used to start off holes. If the operator has very steady hands, then the 118° drill bit can be used without center punching.

135° drill bits have a flatter point which gives the drill bit more cutting surface area. When more surface area cuts the steel, drilling is faster.

Split Point

An extra cutting angle on the 2 cutting edges of a drill bit.

Split Point is designated here in black.

Split Pointing is almost always reserved for 135° HSS drill bits.

Understanding Nomenclature Vis-a-vis Size:

Chart Not To Scale.

Made In

Extra Heavy Duty Web

30% thicker than even heavy duty webs, resists the extra shear stress found in deep hole drilling.

Parabolic Flute

Fast parabolic spiral allows deep hole drilling without frequent drill removal to clear chips.

THRU HOLE
TAPPING

BLIND HOLE &
BOTTOM TAPPING

TAP AND DRILL

NC = National Course
NF = National Fine

TAPER

8 to 10 threads chamfered for easy thread starting in tough materials.

MOST POPULAR STYLE TAP.

PLUG

3 to 5 threads chamfered for general use in thru holes or when tapping to bottom of hole is not critical.

BOTTOM

1-1/2 threads chamfered for use after threads have been started. Use for blind holes or clean tapping to bottom of holes.

Stretch Bits are constructed of a high carbon steel self-feed auger bit, permanently brazed to a flexible shaft. This tool can be inserted through small wall openings enabling the operator to bore holes through studs within the wall cavities without damaging finished walls or ceilings.

Eye Holes are provided at each end of the Stretch Bits which allow easy retrieval of wires from either direction after drilling.

- ◆ Screw Point
- ◆ Self Drilling
- ◆ Fish Hole On Each End
- ◆ Flexible Shaft
- ◆ Sold Individually

1/2" DRILL

- ⦿ Precision point angle for effective penetration through steel and wood.
- ⦿ Extra length flute with continuous cutting edges for drilling deep holes and fast chip removal.
- ⦿ Reduced shank fits all drill motors with 1/2" chucks.
- ⦿ Non-slip grips prevent the bit from spinning in the chuck.

X-Tend Your Drilling Depths!

X-Tendr™ - MAX to MAX SHANK ADAPTER

Part #	Description	List
XT6700	Adapter (1-3/16" x 7-1/2")	\$435.36
XT6750	Adapter Grease (Tube)	\$8.44

Drill Bit Diameter Must Be 1-1/4" Or Larger if X-Tendr™ is to Pass Through Hole Being Drilled.

Drill bit extension system for all SDS-MAX machines.

- ◆ X-Tend Any SDS-MAX® Tool
- ◆ Quick & Safe Connection
- ◆ Simple To Use
- ◆ No Energy Loss
- ◆ No Weak Points
- ◆ Saves Time & Money
- ◆ Reduces Tool Requirements
- ◆ Sold Individually

How it works:

- X-Tendr™ Adapter has double locking SDS-MAX inputs.
- All EXTENSION SHAFTS have 1 SDS-MAX® end which locks into X-Tendr™ Adapter. Other end can be inserted into an SDS-MAX® machine.
- X-Tend any SDS-MAX® drill bit, core bit, tunnel bore drill.
- Reach of X-Tendr™ system limited to 1 adapter and 1 extension.

X-Tendr™ Extension Shafts

Part #	OAL	Shank	List
XT6701	12-1/2"	SDS-MAX	\$71.40
XT6702	30"	SDS-MAX	\$87.78
XT6703	44"	SDS-MAX	\$119.81
XT6704	82-1/2"	SDS-MAX	\$254.14

1. Choose SDS-MAX® desired length Extension.

2. Attach X-Tendr™ Adapter to SDS-MAX® end of Extension.

3. Attach desired SDS-MAX® Rotary Hammer Drill Bit, Core Bit, Tunnel Bore Drill.

Drill Bit Diameter Must Be 1-1/4" Or Larger if X-Tendr™ is to Pass Through Hole Being Drilled.

SDS-MAX® Taper Shanks

Part #	Size	Shank	List
720MAX008	8"	SDS-MAX	\$106.80
720MAX018	18"	SDS-MAX	\$143.56

INSTRUCTIONS

- 1 Wipe off oil or lubricant from the taper of the extension and the inner taper of the core bit.
- 2 Insert the pilot drill into the drive extension first.
- 3 Insert the drive extension into the core bit.
- 4 Start drilling hole until the core bit is 3/8" deep.
- 5 Use the ejector key to push out the pilot drill.
- 6 Continue drilling the hole until the material being drilled fills the core bit interior. Approximately 3" deep.
- 7 Break the drilled material inside the core bit with a chisel (if necessary.)
- 8 Return to Step 6 until desired hole depth is achieved.

These Heavy Duty Rotary Hammer Core Bits are used with SDS-MAX electric rotary hammer machines. The special alloy steel body and Tungsten Carbide withstand continuous hammering. A pilot drill bit and extension are required.

Notice: Core Bit drilling without the use of a pilot drill bit causes excessive pressure on the taper shank system. This can result in breakage to the extension at the tapered end, especially between the two slots. Such jagged breaks are not considered defective and may not be covered under warranty.

Each Core Bit
Includes Pilot Drill

Concrete Screw System

Each concrete screw carbide drill bit is precisely ground to match a certain tolerance to assure proper hole diameter and to achieve maximum thread holding power. The flat on the shank fits all drill adapters. The drill bit is specially heat treated to make it very durable.

- ◆ Polished Finish
- ◆ Sold Individually

Concrete Screw System

SDS-HEX Rotary Hammer drill bits are specifically designed to be used in concrete screw installation. These SDS bits have a special 5/16" **HEX** shoulder for use with standard concrete screw installation sleeves, which eliminate the need for drill adapters. The benefits of using an SDS machine rather than a standard rotation drill means a decrease in operation time of nearly 50%. **SEE BELOW FOR INSTALLATION KIT**

Concrete Screw Installation Sleeve

3 SIMPLE STEPS TO DRILLING REBAR

1. When rebar is encountered while drilling, immediately stop the hammer drill and remove the bit from the hole. (failure to do this will severely damage a carbide hammer bit.)
2. With a rotary rebar cutter mounted in a drill motor with the selector in the **rotary only position**, insert the rotary rebar cutter into the hole and drill through the embedded rebar.
3. Remove the rotary rebar cutter after the rebar has been drilled completely through and finish drilling the hole with the hammer bit.

Rebar Cutters are problem solvers only. A 1/2" Rebar Cutter drilling through #6 (3/4") rebar dead center **may** result in 5 to 10 holes being drilled provided correct speed and pressure are utilized. It is not uncommon for only one piece of rebar to be cut per Rebar Cutter. Rebar Cutters *should* not be used for drilling concrete.

Rebar Cutters are not warrantied for replacement or repair.
